**TIP :**

If you do not want to use food colouring, you can make some juice by boiling vegetables and pour it over the glass noodles to get various colours (noodles do not get such an intense colour as they do with food colouring and they get some taste of juice, too) .

You can put some smoked salmon or cooked chicken together with vegetables into your summer rolls or you can change the vegetables and use the ones you prefer.

If covered, summer rolls can be kept in the fridge for 2 to 3 days.

If you expect guests, put all the ingredients and a bowl with warm water on the table, so that everybody can fill their summer roll as they like.
